Year 3 and 4 (English Version)

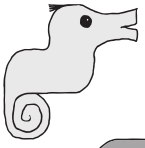

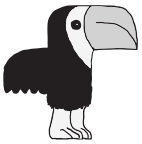

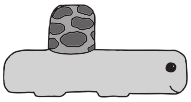

March 2026 Time allowed: 45 minutes

1. For each question exactly one of the 5 options is correct.
2. Each participant is given 24 points at the beginning. For each correct answer 3, 4 or 5 points are added. No answer means 0 points are added. If a wrong answer is given, one quarter of the points is subtracted, i. e. 0.75 points, 1 point or 1.25 points, respectively. At the end, the maximum number of points is 90, the minimum is 0.
3. Calculators and other electronic devices are not allowed.

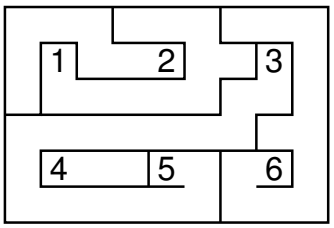

3 point problems

A1 A tile-laying game is shown on the right.
Which piece fits in the space?

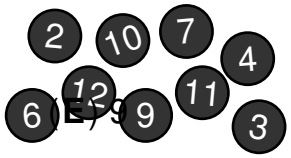

(**A**) 
(**B**) 
(**C**) 
(**D**) 
(**E**) 

A2 A path is drawn to connect two numbers in this labyrinth.
For which two numbers is this possible?

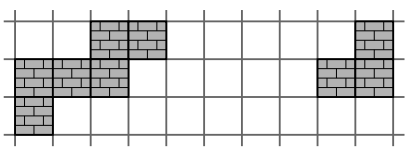

(**A**) 1 and 3 (**B**) 2 and 4 (**C**) 2 and 6
(**D**) 3 and 5 (**E**) 3 and 6

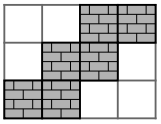

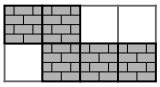

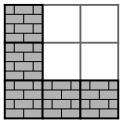

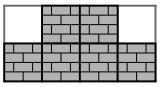

A3 I have twelve game counters with the numbers 1 to 12. Nine of them can be seen on the right. What is the largest number that is missing?

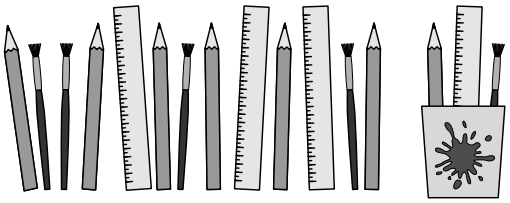

(**A**) 5 (**B**) 6 (**C**) 7 (**D**) 8 (**E**) 9

A4 Which piece can be added into the picture on the right to create a paved path with no gaps?

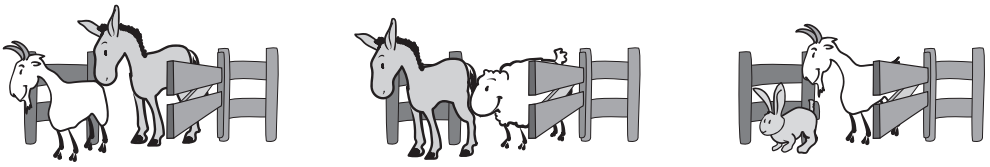

(**A**) 
(**B**) 
(**C**) 
(**D**) 
(**E**) 

A5 Ms. Roth fills each cup with a pencil, a paintbrush and a ruler for a lesson. One cup is already full. How many full cups will Ms. Roth have when she is finished?

(**A**) 4 (**B**) 5 (**C**) 6 (**D**) 7 (**E**) 8

A6 A gate is open in the petting zoo. Four cheeky animals escape. Ferdinand has taken photos. These are mixed up on the table:

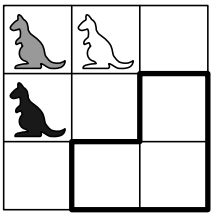

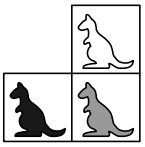

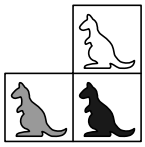

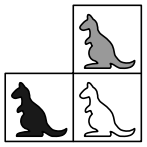

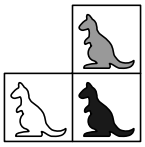

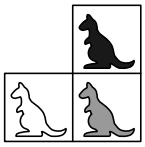

In what order did the four animals escape through the gate?

(**A**) rabbit, donkey, goat, sheep
(**B**) goat, donkey, rabbit, sheep
(**C**) rabbit, goat, donkey, sheep
(**D**) donkey, sheep, rabbit, goat
(**E**) goat, sheep, rabbit, donkey

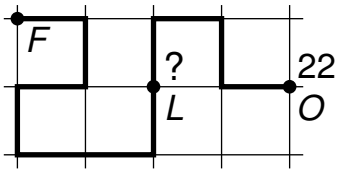

4 point problems

B1 In the picture shown, each row and each column should have one black, one grey and one white kangaroo. What does the bottom right corner look like?

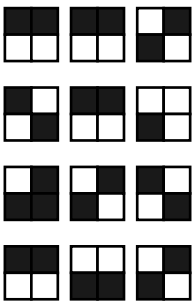

(**A**) 
(**B**) 
(**C**) 
(**D**) 
(**E**) 

B2 A flea hops on squared paper along the thick line from point *F* to point *O*. For this he needs 22 hops of equal length.
After how many hops is he at point *L*?

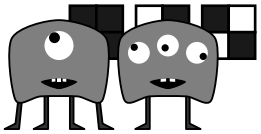

(**A**) 12 (**B**) 13 (**C**) 14 (**D**) 15 (**E**) 16

B3 Each of the numbers 183, 451, 521, 872 and 882 is represented by a row of three patterned squares on the right. A patterned square shows one digit. Squares with the same pattern represent the same digit.
Which number is represented by the pattern at the bottom?

(**A**) 183 (**B**) 451 (**C**) 521 (**D**) 872 (**E**) 882

B4 In the Monster family, each monster has either 1 eye and 4 legs or 3 eyes and 2 legs. Altogether, they have 9 eyes and 16 legs. How many monsters are in the family?

(**A**) 9 (**B**) 8 (**C**) 7 (**D**) 6 (**E**) 5

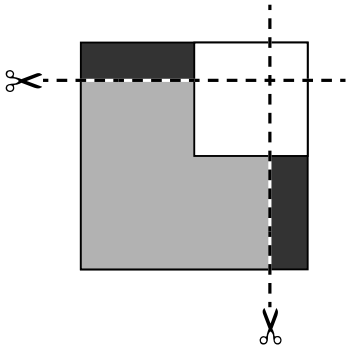

B5 Ruth builds towers on a square grid using cubes of equal size. The height of the towers is shown on the right. Ruth looks at the towers from the

4	8	8	6
2	6	6	8
6	4	2	4
2	2	4	6

front. Taller towers hide any shorter towers which are behind them.
How many towers can Ruth see from the front?

(**A**) 8 (**B**) 9 (**C**) 10 (**D**) 11 (**E**) 12

B6 Finn has three paper squares: one black, one grey and one white. First he places the grey one on top of the black and then puts the white one on top, as shown. He cuts along the dotted lines. How many squares does Finn have now?

(**A**) 4 (**B**) 5 (**C**) 7 (**D**) 8 (**E**) 9

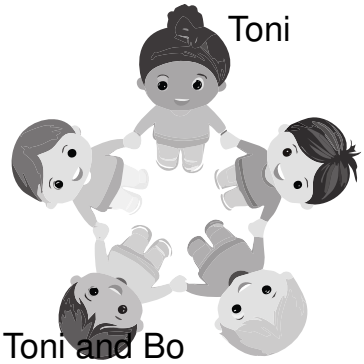

5 point problems

C1 Joscha uses six of these cards 0 1 2 3 4 5 6 7 8 9 + = to make a correct calculation. He then covers the top part: 
What is the sum of the four digits Joscha used?

(**A**) 17 (**B**) 19 (**C**) 21 (**D**) 23 (**E**) 25

C2 Five children – Kim, Toni, Bo, Charlie and Lou – dance in a circle:

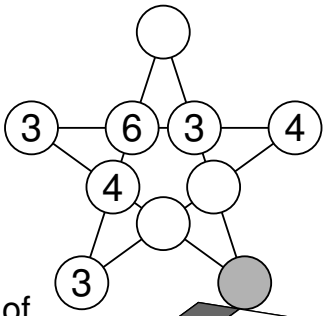

- Kim is holding Toni's left hand.
- Charlie and Bo are not holding hands.
- Bo is holding Lou's right hand.

Who is Charlie holding hands with?

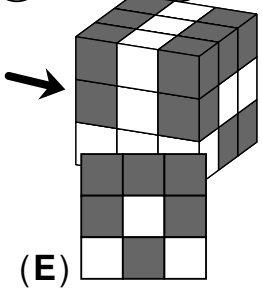

(**A**) Toni and Lou (**B**) Kim and Toni (**C**) Toni and Bo
(**D**) Kim and Bo (**E**) Bo and Lou

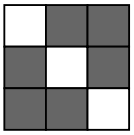

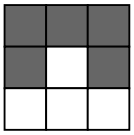

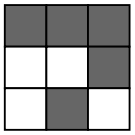

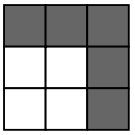

C3 Each circle in the star shape should contain one number.
The four numbers in each straight line should have the same sum.
Which number should be written in the grey circle?

(**A**) 3 (**B**) 4 (**C**) 5 (**D**) 6 (**E**) 7

C4 Lion builds this large cube using 16 black and 11 white small cubes of equal size. His sister Lily looks at this cube from the left.
What could she see?

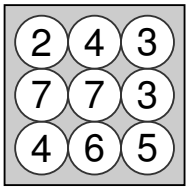

(**A**) 
(**B**) 
(**C**) 
(**D**) 
(**E**)

C5 I have three coloured boxes.
Each contains one type of stick: 1 cm, 2 cm, 3 cm.
I place one stick from the red box onto the table. Then I place more sticks to the right: one from the blue box, then one from the yellow box, then one again from the red box, and so on. This makes a straight line that is 50 cm long.
Which two sticks are at the beginning and end of the line?

(**A**) 1 cm and 2 cm (**B**) 1 cm and 3 cm
(**C**) 2 cm and 3 cm (**D**) 2 cm and 2 cm
(**E**) 3 cm and 3 cm

C6 Nika places coins in each of the nine white circles in the picture, with each circle containing at least one coin. The number in each circle shows how many coins altogether are in the other circles touching this one.
How many coins did Nika place in the nine white circles in total?

(**A**) 16 (**B**) 17 (**C**) 18 (**D**) 19 (**E**) 20
